

Spectral DNC® is a spray-on medication applied directly to the scalp and is intended for the treatment of androgenic alopecia (male pattern baldness) and other types of hair loss. It works both on the vertex of the head and the frontal hair line.

Spectral DNC® contains the highest concentration of clinical proven compounds including highest quality research grade Minoxidil, Aminexil SP94, Retinol, Vitamin & Mineral complex, and herbal extracts in a nanosome carrier agent.

How to use Spectral DNC:

Spectral DNC should be applied wherever you are losing hair. Spectral DNC comes with a localized spray tube that allows application directly on the scalp without losing any of the solution on the hair.

Application takes just seconds in the morning and in the evening. Apply 10 sprays of Spectral DNC and rub it into your scalp. Be sure to wash your hands with soap and water after applying Spectral DNC.

The following tips will help maximize your results with Spectral DNC:

- Apply Spectral DNC regularly; twice a day, everyday.
- You should apply Spectral DNC whether or not your hair has been washed.
- Developing a habit of regular use without skipping applications will maximize your results.
- Always apply 14 sprays, using less or less often than twice per day will reduce the effectiveness.
- Make sure that you allow Spectral DNC to dry completely before going to bed.
- If your scalp is still wet then the solution can smear on the pillow and on the face, which may result in unwanted hair growth on the face.
- If you miss an application of Spectral DNC do not try to make up for it by applying more than twice the next day. Simply resume your normal twice per day application schedule.
- It is best to avoid using styling aids if possible. If you must use styling aids then make sure that Spectral DNC is completely dry on your scalp before applying gel or hair spray.
- To maximize your results with Spectral DNC we recommend washing

your hair every day and using Revita, our high-performance shampoo two to three times per week. It is important to maintain a healthy scalp if you are suffering from hair loss or thinning hair. Dandruff, grease, or build-up of bacteria on the scalp has been linked to accelerated hair loss.

If you answer yes to any of the following questions then Spectral DNC® may be a great choice for you:

YES /NO I have mild to moderate hair loss and I want to grow normally strong and healthy hair, instead of peach fuzz hairs.

YES / NO I want to avoid taking oral prescription medications which can have serious side effects over time.

YES / NO I have a family history of hair loss and I want the best chances to avoid losing my hair.

YES / NO I want a convenient spray lotion that takes just seconds each day to use.

YES / NO I have just recently started losing hair or I have been losing hair for just a few years. I realize that if I have been bald for more than 10 or 15 years then I have very small chances of re-growing my hair.

If you have an advanced stage of hair loss, then we suggest you see our other listings for Spectral.DNC- L. Whatever your stage of hair loss, your best chances to re-grow normally strong and healthy hair or to prevent hair from falling out with minimum side effects is with Spectral DNC® or Spectral.DNC-L®. No other topical medications produce such fast and effective results.

Spectral DNC® contains the following active ingredients:

- **Minoxidil 5%** (clinically proven to help re-grow hair; approved by the FDA in treating male-pattern hair loss for more than 15 years. How Minoxidil works as a treatment for hair loss is not fully understood.)
- **Aminexil SP94** (clinically proven to help re-grow hair.. Research has indicated that hair loss is linked to the stiffening of the hair roots and Aminexil has been specifically developed to prevent the stiffening and premature aging of the roots.)
- **Retinol** (has been shown to improve the absorption and effectiveness of Minoxidil; Minoxidil and Retinol is often prescribed together by dermatologists)
- **Vitamin Complex** (accelerates the metabolism of the hair follicle)

- **Herbal Extracts** (provides circulation and nutrition to the affected tissues)
- **Nanosomes** (microscopic capsules deliver active ingredients deeper into the tissue)
- **Adenosine** (powerful hair regrowth agent, similar action to Minoxidil with no side effects)
- **Procyanidin B-1 and C-2** (hair regrowth agent with no side effects, exceptional results when combined with minoxidil,)

NOTE: Dryness, redness or peeling may occur during the first weeks of treatment. To prevent aggravating the skin, protect it from sun, tanning lights, extreme wind or cold and harsh skincare products. Use of sunscreen is recommended.
